PRIVATE EVENT

Bio4Dreams is the first fully private Italian incubator for innovative startups in Life Science. Bio4Dreams supports researchers and entrepreneurs at a very early stage, when research ideas are still too immature to attract financial partners (BA, VCs etc.) or to be placed on the market providing idea validation, assessment, support to financial partner identification and to Business/Industrial plan definition.

BrainDTech has developed a revolutionary approach to the early diagnosis/treatment monitoring of brain diseases based on a newly discovered and patented molecular mechanism, miRNAs inside microglial microvesicles.

ePhood is an innovative, comprehensive and versatile platform of sharing knowledge in nutraceutics and nutrigenomics. The platform collects individual nutritional data and dietary micro / macro nutrients and correlates them to clinical, lifestyle and genetic profiles to obtain general and personalized recommendations for individuals and groups.

Neuro-Zone delivers pathology-specific cell-based assays for discovery services, based on proprietary MicroTISSUE platform which dissects microenvironment-cell interaction in complex inflammatory scenarios, generating rapid and informative data on efficacy, toxicity, metabolism and mechanism of action
